

Hydraulic Power Unit

The majority of the equipment used in a marine environment are powered by hydraulic drives. The main reasons are the relative simplicity, the low cost, the reliability and the high grade of weather protection.

KLEY FRANCE designs and manufactures all type of Hydraulic Power Unit up to 1500 HP, electrically or diesel driven, common weather proof, explosion proof, etc...

Power Container 20'.

2 x 147 kW Diesel Engine.

For all the machines provided, KLEY FRANCE designs and manufactures the corresponding power pack, driven by a remote control console.

Remote Control Console.
